

Full Service Facility — Galveston, Texas

No. 2 Bradner Street, Pelican Island
Galveston, Texas 77552 • +1 409.744.5514

GENERAL DESCRIPTION

The TETRA base in Galveston, TX is a 379,000-square-foot, full-service facility located on Pelican Island with access to the Houston Ship Channel. Serving deepwater and ultra-deepwater operations in the Gulf of Mexico, the facility provides the full line of TETRA fluids, including clear brine and zinc-free/formate-free fluids, as well as chemical additives, fluid blending, fluid reclamation, fluid filtration, and fluid and chemical storage. It is the Company's second largest facility on the Gulf Coast and the only facility with enough capacity to blend TETRA CS Neptune® fluids.
